

## Ratepayers Discuss Water Rate Problems

Send Resolution to Light & Water Co. Protesting Against Franchise Clause on Hoses

The ratepayers meeting held last Thursday evening in the K. of P. hall to protest against the charge of \$5.00 being put into effect for the use of garden hoses during the summer season was productive of considerable interest.

Councillor Pattinson acted as chairman of the meeting with D. Gillespie as secretary. Mr. Pattinson reported on an interview that afternoon between Mayor Moore, Councillors Snowdon and himself with Mr. Hummel, secretary of the Coleman Light & Water Co. Ltd., relative to the charge being put in to effect.

They pointed out that the increase had been put on at a most inopportune time, when miners were feeling the pinch of slack time, and that the effect of charging the \$5.00 rate would probably result in a number discontinuing the use of the hose.

In reply Mr. Hummel stated that the clause had been sanctioned in the franchise, though it had not been put into effect, therefore the company was justified in collecting the amount. Considerable discussion ensued, and a number present voiced their protests at the charge. Various questions were asked the chairman, who gave a complete report of the discussion between the council members and the company. Some complaint was made of the inequalities in the basis of assessment for water, and a question was asked if it would not be better for meters to be installed, as many felt that the present rate of \$3.50 combined with the hose rate of \$5.00 was too high for the amount of water used. It was explained by the ratepayer

## Garland Will Broadcast

E. J. Garland, candidate for Bow Valley, is to broadcast over a provincial hook up from Edmonton, Calgary and Lethbridge on July 23 from 8:30 to 9:30 p.m. As this gentleman has a message of interest to all workers, it is important that they remember the date.

Mr. and Mrs. Whiteside returned from the Stampede on Sunday

that whereas two or three people may be living in a house and paying \$3.50 plus hose rate. In another house there may be seven or eight and paying \$2.00 or \$2.50 for water service.

Cr. Pattinson stated he could not discuss all the questions asked. The council had taken the matter up with the company, and under the franchise agreement they could not press for a change till the time limit of ten years expired. Certain weaknesses had no doubt come to the surface during the time the franchise had been in force, but the time to remedy these would be when it again came up for discussion.

Several present complained that the charge had been made without any warning being given, and they considered that in deducting the amount from pay statements of men working in the mines that before doing so an opportunity should have been given for the parties concerned to state if they wished to use the hose or not.

The result of the discussion was that a resolution be sent to the company stating that those who decided not to use the hose being refunded the amount paid less the charge of \$1.25 for the month of July.

Since the meeting the assessment has been changed so that the \$5.00 charge may be paid in instalments of \$1.25 during the months of June, July, August and September.

## Schools Under Repair During Holidays

While the summer vacation is on, the schools undergo an annual renovation. Central school is being partly re-shingled, the rooms are being kalsomined and cleaned throughout, desks scrubbed and when the teachers and pupils return, they will be greeted by bright and gleaming class rooms. Every bit of woodwork is being scrubbed, pictures taken down and cleaned, every nook and corner searched out with soap and water, in fact Carter Patterson is making a 100 per cent job in his war against dirt and grime which is bound to accumulate throughout the year. It is a real man's job, requiring two or three husky assistants, and if you don't believe it, just go in the school and have a look around.

Cameron school at West Coleman is being looked after by Mr. T. Brennan, also two of the smaller schools, while Mr. Kilgannon is responsible for the corner school, formerly the bank building.

## Important Notice of Meeting

A meeting of the War Memorial committee, and the executive of the Canadian Legion will be held on Monday evening, July 21, in the council chamber at 8 p.m. The purpose of the meeting is to decide on action in respect to the funds that are now on deposit in the bank, amounting to \$968.00 included in which is \$400 donated by the Elks Lodge this year.

It is important that members of the memorial committee attend to fully discuss the matter—Peter Smith, secretary Memorial Committee.

## Rod & Gun Club Competition

The first competition of the season was held at North Fork, and the prizes were awarded to the following: Biggest basket of fish, R. Penman, 1 1/2 lbs; A McCulloch tied with Penman. Biggest speckled trout prize went to Wm. McCulloch; biggest bull trout to J. McCulloch and biggest grayling to Julius Ancelet. The day's catches were very poor. There were many others out in addition to the Rod & Gun Club.

Paddy Ryan attended the Calgary Stampede, and asked for his opinion of the big show he said, "it was a big flop in point of attendance." The official figures were 202,826 for the week, being 55,843 less than last year for the entire week. This reflects the general conditions of business in the province, but the exhibition directors state that they are well satisfied. Saturday saw the biggest crowd with nearly 44,217 people, and the smallest day was Friday with 27,259.

Maizie Gillespie left on Monday for Vancouver, after visiting her parents for several weeks.

## WARNING Re Damaging Trees by Nailing Posters

Notice is hereby given that nailing posters or advertising matter on live trees in the townsite is strictly prohibited. In order to preserve the trees and so help to retain their beauty, this warning is issued, and any advertising matter found on trees hereafter will be taken off and destroyed.

Town of Coleman

## Rev. and Mrs. Partington Welcomed by Congregation

On Tuesday evening in the parish hall the Anglican congregation welcomed the Rev. and Mrs. A. S. Partington, and there were present several members of other churches, and the Rev. and Mrs. A. E. Larke, of the United Church. An interesting program was given, those contributing being Mrs. A. S. Partington, soprano solos, with piano accompaniment by Mrs. V. Annett; tenor solos by Rev. A. E. Larke; short addresses by the Rev. Mr. Partington, H. Turner and Mr. Larke.

A bouquet of cut flowers was presented to Mrs. Partington by Helen Hancock on behalf of the Ladies Guild. Mr. Partington expressed on behalf of himself and wife their appreciation of the welcome accorded them, and trusted that their ministry here would result in mutual benefit. Refreshments were served at the close of the program, over which Mr. Harold Turner presided as chairman.

## Local News

Mr. and Mrs. Emmerson and family left on Saturday for a holiday at Portland.

Mr. and Mrs. J. Houghton and grandson Jack were visitors at the Calgary Stampede.

Miss Gladys Lees returned to Lethbridge on Sunday evening after spending part of her vacation with her parents.

Mr. and Mrs. Duncanson of Lethbridge are occupying the residence of Mr. and Mrs. Rippon during their absence on vacation.

Mr. and Mrs. Monique Wilton of Fort William are here for the wedding of Sidney White and Miss Agnes Odell, to take place in the United Church at 5 p.m. on Friday.

Frank Graham spent two days in Calgary attending the convention of the Alberta Postmasters Association, motoring up on Monday evening.

Mr. and Mrs. Fraser McLeod of Red Deer, and family, who were visiting with Mr. and Mrs. A. W. H. McLeod, left on Sunday morning for their home.

Ernest Houghton had good luck fishing at the South Fork on Sunday. He caught the limit for one day—20 trout. Chris Rogers and his father J. S. were also out but did not get as big catches as Ernest.

J. D. Matheson, K. C., Conservative candidate, addressed a number of ladies last Saturday evening at the Committee rooms, and a ladies committee under Mrs. Alex. Cornett was organized to boost Mr. Matheson's candidature. About twenty ladies were present.

The members of the Orange Lodge and L. O. B. A. observed the anniversary of July 12th by holding a picnic at the sports ground. The favorite game among the men was pitching horseshoes, and for the children races and other events were held, making a very enjoyable afternoon.

Mr. and Mrs. D. O. Macko returned on Saturday from their honeymoon trip, and have taken up residence in their new home on Sixth street. On their trip they travelled nearly 4,000 miles by automobile, travelling from Calgary and Banff south to Mexico.

Some of the attractions booked for the Palace theatre include, "Spring is Here," George Arliss in "The Green Goddess," George Bancroft in "The Mighty," John Barrymore in "General Crack," "In the Next Room," starring Jack Mulhall and Alice Day; and other leading features.

## Old-Timer Visits Coleman

Over the week end Mr. Tom Clarke of Macleod visited his son, who is assistant to Forest Ranger Boulton. Mr. Clarke is one of the original "mounties," and has lived at Macleod since he resigned from the famous force in 1887. He has many interesting reminiscences of the early history of Southern Alberta, and at one time owned a newspaper in Macleod, and worked as foreman for twelve years on the old Macleod Gazette, a paper published by Charles E. D. Wood, who later was deputy attorney-general in the Haultain administration of Territorial Legislative Assembly days, and who later was district court judge at Weyburn, where he died in 1925.

At present Mr. Clarke is running a commercial printing office in Macleod, and owns a ranch some distance from the town.

Fear is fatal; confidence is constructive.

## Coote Meetings Well Attended

U. F. A. Candidate Urges Workers to Support the Independent Group in Order to Secure Benefits

Meetings were held in the Past towns this week by G. G. Coote, U. F. A. candidate for Macleod Federal constituency. On Tuesday evening he addressed a meeting in the K. of P. hall here, when a very attentive hearing was accorded him. James Fairhurst was the chairman of the meeting.

Mr. Coote spoke at some length on unemployment, scoring the present leaders of the old line parties for their promises and on their past record on immigration. He also spoke on the efforts made to secure the subvention of freight rates on bituminous coal, and the part he (Continued on Page Eight)

## How's Your Bank Account?

It is a common thing for parents to open a bank account for a very young child, taking care of the account until the child is old enough to manage it. Then the bank book is turned over, and Dick or Ruth shoulders a new responsibility.

In this way the child is, early in life, taught the valuable habit of thrift. Practical lessons in the keeping of accounts and records are learned. And as these small savings are conserved and mount upwards, a substantial sum of money is created which will make adequate provision for the later education of the child, or constitute a reserve of capital to start a business or enable a girl to assist in establishing her own home.

Famous leaders in commerce have said that regular saving, even on a small scale, is the surest foundation for financial success. To save only five dollars a week is to build up a financial reserve, which will grow. To contract five dollars debt weekly is to accumulate a growing burden.

Nature starts each of us in life with an account at the Bank of Health. With only a few exceptions all we reach the age of responsibility for the care of the body. It makes all the difference in the world whether we handle our health account wisely or foolishly.

How is your account at the Bank of Health? Have you a good balance? Is it shrinking instead of growing? You ought to know.

Nature abhors and punishes waste while she approves and rewards thrift, both in what we call the best realm of Nature and in the individual human life.

Experts tell us that reckless and unchecked cutting and fishing threaten the existence of some of the world's largest forests and fisheries. The supplies we thought unlimited may fall. We are learning that continuance of supply depends on conservation, which is simply a better word for thrift.

The same is true of health. Nature exacts heavy penalties for waste. Preventive work promotes and assists the practice of health thrift.

Just as a savings account is built up by small deposits, so, too, must our health reserve be built up. Enough food and exercise, enough rest and relaxation, must be deposited in the Bank of Health every twenty-four hours.

These deposits must be in good currency, too. Nature, like our bankers, accepts no bad bills or counterfeit coins.

Why not look into this matter of your account at the Bank of Health? A wise way to begin is to go to your doctor for a complete medical examination. Don't wait until you are sick to visit your doctor; go to him when you are well and have him check you up. Take stock.

Another good plan is to repeat the process of a thorough medical examination at least once a year—say, on your birthday anniversary. In this way any disease which may, quite unknown to you, be making incursions, will be discovered in its early stages, checked and cured, but which if left to develop undisturbed until you begin to "feel sick" may by then have reached the stage where it is beyond cure.

### World's First Talkie Sign

Novelty Introduced At Chicago By Envelope Company

What is probably the first talking sign in the world made its debut before a crowd of over 3,000 Rotarians with a speech boosting Chicago, telling about its schools, churches, parks, playgrounds, libraries, universities, boulevards, policemen and other civic assets.

George D. Gaw of the Gaw-O'Hara Envelope Company, is responsible for the sign, which is a 50-by-20 foot affair on the envelope company's plant in North Sacramento boulevard.

The speech was made before the microphone and amplified through the loud speaker hidden in the non lettering but in the future records lauding the city and boosting for its "Century of Progress" will furnish voice to the sign throughout the day, according to Mr. Gaw.

### Motorist Sued For Train Wreck

Had To Pay \$10,000 For Causing Derailment In Illinois

Automobile drivers must pay for the train wrecks they cause under certain circumstances. Such was the gist of a decision handed down by the district court for the southern district of Illinois and reported by the legal department of the American Motorists' Association. The suit arose as the result of a motorist driving over the tracks of a railroad, causing the derailment of an engine and five freight cars. The railroad sued the motorist for \$30,000. A verdict of \$10,000 was given, which was sustained on appeal to the higher court.

A tornado may travel as slowly as ten miles an hour, or it may speed at sixty.

Lead Mines of Spain and Britain were worked more than a thousand years before Christ.

## Four Doses Relieved Bad Attack of Cholera

Mr. W. J. Cooper, Maunabo, Alta., writes: "A year ago last spring I arrived in Canada with my family, and one of my boys, aged six, was suffering very much with cholera. When we arrived I had a few hours to wait, and told me of the attendants at the station about it, and he asked me if I had ever tried Dr. Fowler's Extract of Wild Strawberry. I had never heard of it in England, so he told me I could get it in Winnipeg. I am pleased to say I had only to give the child four doses and he got well and was quite cheerful by the next morning."

### Airplane Flight To Far North

Government 'Planes To Open Up Air Route In Sub-Arctic Areas

To inspect aeroplane supply caches in the Canadian sub-Arctic and with a view to opening up aerial communication routes in the Barren Lands belt, in the Northwest Territories, a special detachment of the two government aeroplanes will leave Rockcliffe Aerodrome in the near future for an air tour which may extend over 35,000 miles, most of it over a little travelled country.

Flight Lieut. F. J. Mawdsley, of the civil aviation branch of the Department of National Defence, will be in charge and will pilot one of the two 'planes. Flight Sergt. H. J. Winny will pilot the other. In addition to the two pilots there will be two mechanics, Corporal S. C. Dearway, who will be the camera operator, and C. McDonald, island surveyor of the topographical surveys.

The flight will be the first official government step toward the opening up of air lanes in the North West Territories. The majority of the trip will be in the vicinity of the Mackenzie River Basin, the Great Slave Lake area and northward to Coronation Gulf. The flight will also travel over that part of Canada lying to the west of Hudson Bay north of Churchill. With only a few exceptions all the caches to be inspected will be just to the south of the Arctic circle.

The detachment will return to Ottawa before the freeze-up.

## SUMMER HEAT HARD ON BABY

No season of the year is so dangerous to the life of a little one as the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt action is at hand, the baby may be beyond all human help before the mother realizes it. In summer is the season of diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may develop so quickly that unless prompt action is taken, the baby may be beyond all human help before the mother realizes it. In summer is the season of diarrhoea, cholera infantum, dysentery and colic are most prevalent. Any of these troubles may develop so quickly that unless prompt action is taken, the baby may be beyond all human help before the mother realizes it.

### Edmonton Exhibition

Prize List Contains Regulations Regarding Surgical Treatment Of Show Animals

The Edmonton Exhibition prize list contains a regulation in the cattle section, that any animal exhibited, which has been so treated as to alter its natural conformation, will be disqualified. Competent veterinarians will examine the cattle to ensure the enforcement of this regulation. It is in line with the present wide agitation to eliminate the cutting of ties and the surgical or other treatment of show animals for show purposes.

After Ten Years Of Asthma Dr. J. D. Kellogg's Asthma Remedy proved the only relief for one grateful user, and this is but one case among many. Little wonder that it has now become the one recognized remedy on the market. It has earned its fame by its never failing effectiveness. It is an answer to today, as it has done for years. It is the greatest asthma specific within the reach of suffering humanity.

### Chicago Stock Exchange

Suggested That Membership Be Extended To Canadians

The governing committee of the Chicago Stock Exchange has recommended to the membership of the exchange that the constitution be amended to admit Canadian citizens. Unless disapproved by the members in ten days, the proposed change will become effective.

Announcement was also made of plans to extend the Chicago Stock Exchange's ticker service into Canada within the next six months.

### A Huge Birthday Cake

One of the largest birthday cakes ever cut in London was consumed recently when the British and Foreign Bible Society celebrated its 126th birthday. The cake weighed 126 pounds—a pound for every year—and carried 126 candles. The cake was made in the design of a Chinese building.

Voluntary Bird Census Takers Many hundreds of persons in Canada and the United States are voluntarily assisting in the taking of a waterfowl census to determine any increase or decrease in the numbers of waterfowl that inhabit North America. This is not strictly a census, but very valuable data are being secured.

Minard's Liniment checks Colds at once.

### Saskatchewan Loses Valuable Man

Dr. W. Carrothers Accepts Appointment At University Of British Columbia

Dr. W. Carrothers, professor of economics at the University of Saskatchewan, who has accepted an appointment as professor of economics at the University of British Columbia, will leave Saskatchewan in time for the opening of the fall term some time in August.

Born in the County of Fermanagh, Ireland, Dr. Carrothers attended college at Belfast, coming to Canada in 1911. He attended Wesley College, affiliated with the University of Manitoba, graduating from there in 1916 with the degree of bachelor of arts. Upon leaving university, Dr. Carrothers enlisted with the 44th Canadian Infantry, later transferring to the Air Force. He was awarded the D.P.C. and the Croix de Guerre.

Following the war, he attended Edinburgh University and studied under Professor J. Shield Nicholson, obtaining the degree of Ph.D. He was appointed to the staff of the University of Saskatchewan as professor of economics.

At the University of British Columbia, the departments of economics, sociology and political science are combined. Dr. Carrothers will be in the economics section, holding the position of second in the department.

Dr. Carrothers' work during the past few years has received widespread notice. His book, "Immigration from the British Isles," published in 1929, was very favorably received.

He has been closely identified with the work of returned men, for two years holding the position of president of the Canadian Legion here, and he also served a term as president of the provincial council. Since last December he has served as an alderman on the city council in Saskatoon, having been elected in the civic elections at that time.

### The Imperial Conference

Material Resources and Wealth Possessed By British Empire

The British government intends to enter the Imperial Conference free and unfettered by prejudice or bias, declared Right Hon. J. H. Thomas, secretary for the Dominions, in addressing the Empire luncheon at the opening of "Civic and Empire Week," at Colchester, Essex.

Mr. Thomas proceeded to discuss the unemployment problem and Great Britain's handicaps as the result of the financial burdens of the war. He said the Imperial Conference would give an unique opportunity for a free and unfettered discussion of all the aspects of this question. As he had examined it, everything the United States possessed in material resources and wealth was possessed within the ambit of the British Empire.

"It is because of that knowledge that I, on behalf of the government, announce we intend to enter the Imperial Conference to consider every problem on its merits, unfettered by prejudice or bias, and prepared with a single minded desire to try to find a solution of the problem," he said.

### Has Heavy Task

New U.S. Minister To Canada Has Busy Days Ahead

The United States senate without a record vote has confirmed the nomination of Colonel Hiram L. MacNider, of Iowa, as minister to Canada.

His tasks as American minister to Canada will be trying. There is bitter resentment throughout the provinces toward the new tariff bill. The stupidities of prohibition enforcement on the border have almost exhausted the patience of Canadians. The administration of the immigration laws, too, stands in need of civilizing.

Colonel MacNider has many busy days ahead of him—Memphis Commercial Appeal.

Japan Building 'Planes Army airplanes built entirely in Japan are proving highly satisfactory, according to an official report issued by the aviation department of the ministry of war. Recently two scout 'planes made night-flying tests in which they met every requirement of safety, speed and general airworthiness. Airplanes are now being manufactured extensively by the Kawasaki and Mitsubishi dockyards.

Minard's Liniment for all Strains.

The Bishop's Discovery "I never knew until I got a car," said the bishop, "that profanity was so prevalent."

"Do you hear much of it on the road?"

"Why," replied the bishop, "nearly everybody I bump into swears dreadfully."

Newport News	1,238,785 "
Mobile	1,115,659 "

### UNCOOKED SALAD DRESSING

Warm weather and plenty of vegetables combine to make the tempting salad a frequent dish on the menu. The secret of a delightful salad is the dressing and here is the recipe for an uncooked salad dressing that will be relished by every member of the family—and it can be made up quickly, and, once made, it will keep for weeks:

- 2 eggs.
- 1 teaspoonful salt.
- 1 teaspoonful mustard.
- 1 cup vinegar.
- 1 can Eagle Brand Milk.

Beat vigorously all ingredients except vinegar, for a few minutes. Add vinegar, stir well and set aside for a few hours to thicken.

Persian Balm is magical in creating alluring complexions. A little gentle rubbing and your skin is invigorated and touched with the true beauty of youth. Charming, fragrant. Delightful to use. Cools and caresses the skin. Relieves all roughness and chafing caused by weather conditions. Tones and stimulates. Enhances and protects the loveliest complexion. Unrivalled as a perfect aid to beauty and charm.

The Regina Leader-Post says: "An optimist is a man who expects to do this year's business on last year's advertising."

### French Evacuation Of The Rhine

Reports State That Departure Of Troops Was Somewhat Hurdled

All was not so quiet and peaceful as official reports stated when the last French troops left Mainz and Wiesbaden recently, according to the Paris National organ, "La Liberté," which describes the departure under the headline of "violent incidents."

La Liberté says that, owing to hostile manifestations, booing and whistling by the crowd at the Mainz station, Gen. Guillaumat, commander-in-chief of the Rhine army, had drawn the blinds of the compartment occupied by himself and his staff. The newspaper also quotes a German newspaper story to the effect that the French troops covered the distance in two minutes, whereas ten minutes was usually taken for the same march.

The Lokal Anzeiger calls it "precipitated departure."

Gen. Guillaumat himself, who arrived in Paris with the president of the inter-allied high commission, M. Tirard, declared the departure of the French troops was effected normally without any noticeable incident.

M. Tirard said: "We have given evidence of our confidence in the good faith of Germany. May it be understood and appreciated by our government and population of the Reich."

### Time Not Worth Much

Do you know how many feathers are on a hen's back? The winner of a recent contest to determine just that has found there are on an average of 8,120. The winner dissected a hen's skin and painstakingly numbered each feather, arriving at the above total.

After thirty-five time seems to pass so rapidly that by the time you have forgiven somebody for his Christmas present it's time to do it all over again.

Talkies in German were recently shown in Helsinki, Finland, with some success.

## Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Wax Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Appleford Paper Products LIMITED HAMILTON, ONT.

Western Representatives: HUNTER-MARTIN & CO., REGINA, SASK.

## BORDER PATROL IS COMMENDED BY U.S. OFFICIAL

Washington.—The Canadian border patrol was credited by Representative Clancy, Republican, Michigan, with having "practically killed illicit liquor traffic across the United States border."

Emphasizing that the Canadian Government is "absolutely co-operating," Clancy contended that there was no necessity for the "dangerous activities of the United States patrol in operating its boats without running lights." He recently protested to the treasury department that this was the practice of the United States patrol boats.

While lauding the Canadian border patrol for its "honesty, courtesy, service and efficiency," the Michigan representative quoted E. W. Camp, former commissioner of customs, as describing the United States border patrol as "about 90 per cent. crooked or inefficient."

Clancy attributed the difference he portrayed to the different liquor laws of the two countries. Canadians, he said, "respect and obey their liquor law because they have a good one." In the United States, he said, "we can't build our jails fast enough."

## France Delays Naval Program

Will Open the Way For Naval Negotiations With Italy

Paris, France.—Foreign minister Aristide Briand has announced suspension of France's shipbuilding program until December 15 to open the way for naval negotiations with Italy. He told the Foreign Relations Committee of the Chamber of Deputies, at the same time, that "another war in Europe is impossible and inadmissible."

Mr. Briand assured the committee there was no reason for "emotion concerning the relations between France and Italy."

Disclosing that no more ships would be put on the stocks in the French building program before next December, Minister Briand said Premier Mussolini had been informed of that fact officially.

In conclusion, the foreign minister asserted that while Italy had demanded naval parity the Italian government never had furnished figures or arguments to justify the claim.

## Must Import Wheat

Portugal Is Now Faced With a Serious Shortage

Lisbon, Portugal.—Because of a shortage of wheat, the National Association of Millers have suspended work. No fear of a bread famine was felt, however, since army stocks are sufficient to keep up the daily supply without resort being made to a ration system until the government is able to modify the law concerning the import of foreign wheat.

The public has been advised not to waste bread and the Minister of Agriculture has ordered all wheat merchants to declare their stocks so the government may be able to fix the quantity to be imported above the legal quota.

Alarming reports have reached Lisbon from certain parts of the interior where there is a serious corn shortage.

## New Woman Member For British House

Fourteen Now In Parliament, Nine Being On Labor Side

London, England.—With the election of Lady Noel Buxton to the House of Commons in the North Norfolk by-election, there are 14 women in parliament, the greatest number in history.

Of the 14, nine are Labor members, three Conservatives, one Liberal and one Independent. One of the 14, Right Hon. Margaret Bondfield, Minister of Labor, is the first woman to become a member of the British cabinet, while another, Miss Susan Lawrence, is parliamentary secretary to the Ministry of Health.

## Population Of Prince Albert

Prince Albert, Sask.—Local civic officials and members of civic boost organizations are claiming a population of 12,000 for Prince Albert, the voters' lists having shown there are 4,755 voters within the boundaries of the city. This new total is based on the contention that the number of those entitled to cast a vote is generally about one-third of the population.

W. N. U. 1840

## Labor Government Escapes Defeat

Have Slim Majority On Critical Division In British House

London, England.—MacDonald Labor Government escaped defeat by the slim majority of three votes in a critical division in the House of Commons on the finance bill. It was the smallest majority in this government's career, which was sustained by eight votes two months ago on the coal mines bill and lost a vote on a minor clause of the coal bill before that.

The vote was against an amendment moved by Rt. Hon. David Lloyd George, the Liberal leader, under which profits spent upon modernization or improvements of plants or machinery would be rendered exempt from income tax.

Although it was the Liberal leader who sought the amendment which met adamant opposition from the chancellor of the exchequer, it was some of the Liberals who saved the government and further weakened the broken solidarity of the Liberal party in the House. Four Liberals voted with the Labor government. They were D. Simon, of the Withington division of Manchester; Sir William Edge, Leicester; Sir Robert Hutchison and Percy A. Harris, Bethnal Green. Beside these, several Liberals, including Sir Godfrey Collins and Sir Donald McLean, abstained from voting.

## Boy Scout Jamboree

First Official Jamboree Ever Held In Canada Staged At Prince Albert National Park

Prince Albert.—First boy scout jamboree ever held in Canada was officially opened in Prince Albert National Park, where 475 scouts, wearing the roll-call. Situated on beautiful Lake Waskesiu, the site selected for the camp is ideal in every way. "Big Beach," nearly half a mile long, paved with clear, white sand, and curving out to Prospect Point, offers fine bathing facilities, combined with perfect safety.

Waskesiu Beach, the park headquarters and the site of the western summer home owned by Premier Mackenzie King, is a government motor camp, equipped with kitchen shelters, open fireplaces, life-saving equipment, wardens' quarters, service and filling stations.

## Ban On U.S. Apples

Order Issued By British Government Effective Between July 7 and November 15th

Toronto, Ont.—A. M. Wiseman, British trade commissioner for Canada in Ontario, has received official information from the British government of an order just issued, prohibiting the importation of raw apples from the United States into the United Kingdom, between July 7 and November 15.

Exceptions to the ban are: in barrels, United States fancy and United States No. 1; in boxes, extra fancy and fancy. These must be accompanied by certificates signed by an authorized inspector of the United States department of agriculture.

It is learned that the embargo may be due to a fruit fly known as the "railroad borer," which is not believed to exist in England.

## Disastrous Forest Fires

Loss In Northern Saskatchewan During Three Months \$138,929

Prince Albert, Sask.—Forest wealth of more than \$138,929 went up in smoke in the fire ravages in Northern Saskatchewan from April 1 to June 30, Dominion forestry office revealed. This figure covers only 195 of the 225 fires reported in this period, but it includes the major conflagrations.

Including the disastrous fire at Birch Bark Lake, 171,627 acres were burned over by the fires; 17,723,000 board feet of valuable saw timber burned, and 3,032,000 board feet destroyed. Sixty-five thousand of the 108,338 cords of fuel and pulpwood in fire areas are salvageable. Causes of the fires are summarized as follows: Settlers, 91; campers and travellers, 43; incendiary, 34; railways, 14; smokers, 6; unknown, 5; lightning, 1, and lumbering, 1.

## Marksmen At 78

Bisley Camp, England.—Sergt. MacKny, of Scotland, is 78 years of age. He won the King's prize, classic for Empire marksmen, though it was called the Queen's prize then, back in 1883. But if anybody thinks he is losing his keen eye and steady hand he has only to point to the score card he hung up at the Bisley meet recently—six consecutive bulls' eyes at 200 yards.

## Testing Out Glider

Flight Across Atlantic May Be Attempted Later

New York.—A wireless message from the liner "Saturnia" revealed that the glider "Glabourne Foster" stayed in the air for eight hours, believed to be the longest ocean flight ever made in a towed glider.

The glider, named for the Broadway actress who is sponsoring the venture, is being taken to Gibraltar for an attempted east-west flight across the ocean behind a ship. On the eastward voyage practice flights are being made by the youthful owners, Hugh Keavney and Robert Lewis.

## Had Narrow Escape

Markinch Man Left Grain Bin Just Before Wall Gave Way

Markinch, Sask.—J. E. Burke, local agent for the North Star Grain Elevator Company, narrowly escaped being buried alive when a grain bin in the elevator, next to the one he had been cleaning, burst open, just as he had climbed out, pouring several tons of wheat into the space he had just vacated.

Had the breakage occurred but a few moments sooner, it is probable that Burke would have been hopelessly trapped in the bin, with little, if any, chance of getting out.

## VICEROY WOULD DEAL WITH FIRM HAND IN INDIA

Simla, India.—A fight to the finish with the civil disobedience movement was promised by the viceroy of India, Lord Irwin, in his address to the Indian legislature at Simla.

"As long as civil disobedience persists we must fight it with all our strength," Lord Irwin said, "I believe the right and best solution to the riddle of India will be found only in Britain and India joining together in the search."

Lord Irwin bitterly denounced the civil disobedience method of procedure instituted by Mahatma Gandhi, now jailed. He said it was a "deliberate attempt to coerce established authority by mass action."

"It, therefore, on account of its nature and inevitable developments, must be regarded as unconstitutional and dangerously subversive. Mass action, even if the promoters intend it to be non-violent, is nothing but the application of force under another form. And when it is so, it is intended to make government impossible, the government is bound either to resist or abdicate."

The present movement is exactly analogous to a general strike in an industrial country intended to force the government by mass pressure instead of argument."

In reference to the Simon commission's report on India and the proposed round table conference in London next autumn, Lord Irwin said:

"The responsibility of expressing a considered opinion has now passed to the government of India—and just as the Simon commission would have failed in its duty to parliament if it had not presented a report reflecting faithfully its own conclusions as members of the British Parliament, so the government of India would fail in its duty if, similarly, it did not approach a consideration of the commission's report with complete liberty of judgment."

## IN MOTOR ACCIDENT

Duke of York, who figured in a motor collision on his way to the second cricket test match at Lords. He was uninjured.

## Investigate Butter Prices

Charge Made That Combine Exists Amongst Certain Produce Companies

Ottawa, Ont.—Charges that a combine exists amongst certain produce companies with a view to depressing the price of butter to the producers may be ventilated under the Combines Investigation Act, at least in one section of Canada, if the representations of Jean Francois Pouliot, former Liberal member of Parliament for Temiskaming, Que., are prosecuted to their ultimate stages.

In a communication to Hon. Peter Hennessey, Minister of Labor, was enclosed a copy of a newspaper circulating in his constituency where, in the assertion is made that the wholesale dealers "keep the market prices low when they purchase butter and accumulate it in cold storage for some time, selling it at an exorbitant price to the consumer later."

They thus deprive the farmer of his legitimate profits, says Mr. Pouliot.

The former member asked the minister to intervene under the Combines Investigation Act.

## Crooks Displace Decent Men

Given Election Posts In Chicago Despite Records

Chicago, Ill.—Throwing an illuminating light upon Chicago election disorders and the ability of known crooks to get into public life, from minor positions to the state senate and the bench, a supplemental petition has been filed before County Judge Edmund V. Maguire.

The petition names 21 men and women, alleged to have police and criminal records, who have been appointed as election judges and clerks. This petition, signed by a large number of reputable voters, follows one filed last month in which 275 judges and clerks were named as having police or prison records. Men and women judges and clerks with clean records were displaced to make room for the list handed in by the political bosses, it is asserted.

## Expects Heavy Crop

Saskatoon.—Third generation Marquis wheat is standing four feet high on the farm of Henry W. Fisher, at Hague, Sask., north of here, and the heads are about four inches in length. If nothing happens to it, Fisher expects his 50-acre crop to go over 40 bushels to the acre.

## TWINS TAKE LONG TRIP

June and George Hunt, two-year-old Lancashire twins, sailed recently on a six-thousand-mile trip from Liverpool to British Columbia, on board the Canadian Pacific liner "Duchess of Atholl." George looks as though quite capable of defending sister June and faces the world with the air of one ready for all hazards. However, Canadian Pacific officials, both on the ship and the railway, smoothed the way for the tots and their trip was one long playtime to the two of them.

## Milling Qualities Excellent

Millers In Britain Are Enthusiastic Over Garnet Wheat

Ottawa, Ont.—Considerable enthusiasm was expressed among millers of Great Britain and on the continent who investigated "Garnet" wheat as to its milling qualities. A report by L. H. Newman, Dominion cerealist, on the result of the investigations of specially bagged shipment of this blend of wheat overseas has been made public. For a time at least Garnet should be shipped as a separate variety, instead of mixed with Manitobas. This would give the millers an opportunity of knowing the variety they were dealing with and they could treat it to the best advantage.

The Federal Department of Agriculture decided to submit Garnet to test by millers in the United Kingdom, and in different European countries. A year ago 6,700 bushels were shipped overseas to men expert in milling to obtain their opinions as to its suitability. These men were asked a series of questions, and Mr. Newman's report includes the replies they made.

## Would Halt Immigration

President Beatty of the C.P.R. Would Put Out 90 Entries From U.S. and Europe

Toronto, Ont.—Immigration from the United States and Europe should be stopped for the time being at least, said E. W. Beatty, K.C., president of the Canadian Pacific Railway, in an interview here. Mr. Beatty would not include on the ban, however, "those British immigrants who bring their own capital and can proceed under their own steam."

Unemployment is bad in the building trades, I think, because the usual projects of big buildings are holding back until the wheat situation clears up. But if we have a normal crop this year and it moves out in a normal way, which it should, unless there is a permanent resistance in Europe, which I doubt, the situation in Canada should clear up," said Mr. Beatty.

## Proposed Power Line

Plan To Produce Power For Saskatchewan Being Considered

Prince Albert.—A proposal by interests of eastern Canada and the United States for expenditure of \$1,500,000 on construction of a power project at what is known as "The Horseshoe Bend" on the Saskatchewan River, is under consideration of the Saskatchewan government.

The site for the proposed harnessing of the river, which would produce power for distribution throughout the province, is 35 miles east of Prince Albert.

It was said here that the Fraser Bros. Engineering Company of Montreal, and Rollins and Sons, Boston, are backing the scheme. It is considered development of northern Saskatchewan's pulpwood resources would follow completion of the project.

## U. S. SENATOR SAYS TRADE WITH CANADA IS KILLED

Washington.—Senator George of Georgia, in a statement issued recently through the Democratic National Committee, assailed administration for "strangling Canadian trade with the greediest tariff bill ever enacted." The tariff, he said, "has squeezed more than a protesting squawk out of our northern neighbor and best customer."

"Unwittingly or not it has made the Smoot-Hawley-Grundy tariff an important issue in the forthcoming general election in Canada, to which country, in 1929, we exported \$948,000,000 worth of commodities, and from which we imported the same year shipments to the sum of \$502,000,000—a trade balance of \$446,000,000 in our favor."

"Obviously the loss or the serious curtailment of our trade with the Dominion of Canada is no trifling incident. On the contrary, it presents proportions which, in time, may assume aspects that will have to be treated as an economic calamity."

"Figures compiled in the department of commerce confirm the fact that when the president approved the Smoot-Hawley-Grundy tariff act he killed the proverbial goose that lays the golden eggs with a stroke of his pen."

"It is to be regretted that efforts to promote friendly relations with our neighbors are not supported by liberal trade policies."

## B. N. A. BILL HAS RECEIVED ROYAL ASSENT

London, England.—The British North America bill has received Royal assent and became law. It has passed both Houses of Parliament in the extraordinarily short period of 15 days, notwithstanding the fact that the session has been unusually busy.

The bill amends the British North America Act to give effect to the arrangements concluded between the Canadian Federal Government and the governments of Manitoba, Saskatchewan and Alberta for the return of natural resources to the three provinces. The turning over of certain Crown lands to the jurisdiction of the province of British Columbia is also provided.

The province of Manitoba celebrates its 50th anniversary as a province-member of the Dominion of Canada, on July 15. It was in order that the bill might become law before this event that its progress through Westminster was so swiftly expedited.

## Claim Of Rancher

Earl Is Confirmed

Earl of Eglmont Belongs To Alberta Men Says Judge

London, England.—Mr. Justice Eve in Chancery Division of the supreme court confirmed the claim of Frederick Trevelyan Perceval, former Alberta rancher, to the title and estates of the Earl of Eglmont.

His Lordship confirmed the decision made four weeks ago by the Master of the Chancery, P. W. Vandler, who found the claims of Roger Polminal, retired optician, and James William Perceval, baker, should be dismissed.

Mr. Justice Eve granted a declaration that the "rancher earl" was entitled to the monies in the hands of the trustees, subject to trusts of settlements, and that the trustees should make a vesting charge in favor of Perceval.

## For Poultry Congress

Exhibits From Brandon District Now On The Way To Big Show

Brandon.—An exhibit of five poultry from the Brandon district is now on its way to the World's Poultry Congress, being held in London, England, this month.

Thirteen of the 50 birds going from Manitoba were contributed by exhibitors in the district. Mrs. Jos. Woods sent three Black Orpingtons; Jas. Clarke, three Black Wyandottes; John Windover, pair of White Chinese geese; the provincial exhibition park, a pair of Canada wild geese; Roger Morrison, a Barred Rock cock; Mrs. John Mumby, a white turkey tom, and Mrs. A. M. MacPherson, a white turkey hen. There are to be about 1,000 birds from all Canada at the show in London.

## To Make Long Trip

Government Aviators Have Left On Extended Flight To North

Lac Du Bonnet, Man.—Two Canadian government airplanes, equipped for a three-month cruise, hopped off on a trip which will eventually take them to Aklayik, at the delta of the Mackenzie River on Canada's northwest shore. Under command of Flight Lieutenant P. J. Mawdsley, the party plans to go north by Stony Rapids, Sask., and along the Mackenzie. The return will be by Great Bear Lake and Coppermine River, Baker Lake, Chesterfield Inlet and Churchill, at the terminus of the Hudson bay Railway.

## Vancouver Grain Exports

Vancouver, B.C.—There is now no hope that the export grain total from Vancouver will reach 50,000,000 bushels for the current year 1929-30. The total exported to date is 46,837,267 bushels according to the regular report of the Vancouver Harbor Board. The export at this time a year ago was 83,834,934 bushels.

## For Poultry Show

Ottawa, Ont.—Representative of the aristocracy of the Canadian poultry world, 800 birds are assembled in Ottawa awaiting shipment to the World Poultry Congress, which takes place in London, England, towards the end of the month. They have been sent, at least from every province of the Dominion.

The initial order for silverware for the new Waldorf-Astoria Hotel, in New York, calls for 100,000 pieces.

## NOTES AND COMMENTS

The amount of free literature which floods the mail these days concerning politics, and which the busy man has not the time or inclination to read, is so much waste effort. A little more in the realm of accomplishment and less of words creates greater impression than words, words—and more words.

A great deal of this stuff is sent out free of any postage charges by the parties sending it. The public pays in the long run. But let the public drop a letter in the mail without sufficient postage, and the unintentional offender pays double the value. No wonder the postmasters protest at the amount of work they do for inadequate payment.

Disraeli defined practical men "as those who continue to practice the mistakes of their predecessors." The law of life is change and progress. Methods of even ten years ago are fast being superseded. The coal industry has suffered from the introduction of other fuels, and one of the prime requisites towards enabling it to regain its former markets is continued research and experiments to ascertain or demonstrate more efficient uses of coal, either by pulverization, or the designing of apparatus which will give greater efficiency.

The reply might be made, as it was made by a coal salesman, that this is not the business of the coal operators or the industry. It is a great mistake to take this view. Manufacturers must devise ways of making their products popular, by demonstrating to the public why it is to their interests to buy them. The same rule applies to the coal industry. Of what value is it to have great producing capacity if the outlet is not developed for the use of the coal? There is urgent need for research, experimental work and co-operation along these lines if the market for coal is to be developed. Freight rate subsidies and other artificial aids are only of temporary effect. We must dig deeper to re-establish the coal industry than rely on merely protective measures. Battles are won by aggressive methods.

Despite summer heat, candidates are endeavoring to inject vigor into the campaign. It is difficult—the vacation spirit is abroad? Many ask, why did Premier King bring on an election at such a season. The only answer is that he took up the challenge of R. B. Bennett, the leader of the opposition. The result is that we are being flooded with political words of wisdom or otherwise at a time when we would prefer to seek the cooling streams and go a-fishing. Those who are fortunate escape the deluge of words.

This business of saving the country from disaster as preached by political parties has its humorous side. No matter which party is in power, things go on just the same, and there is much truth to the oft-repeated statement that the only real difference is that one party is in power and the other out. There must be rivalry however, otherwise corrupt governments would have their sway and the public interests would be ignored. That is a very good reason why every person entitled to vote should exercise his or her right.

"Are you in favor of unemployment insurance, a full dinner pail and two weeks holiday with pay?" queries someone at a political meeting, to which the candidate replies: "You may rest assured that if returned to power, we will

use every effort to provide steady employment, give old-age pensions and provide for the comfort of the worker." Loud and prolonged applause follows, the candidate smiles a smile of self-esteem, and the cynic sits back and mutters "Applesauce!"

One frequently hears the remark, "Look what so and so town is doing." There is nothing to stop business men in other towns doing the same. Business activity is stimulated by creative effort by business men. The public judge accordingly.

# The Pending Completion Of Hudson Bay Railway Will Stimulate Mining Interest

With the Hudson Bay Railway in its final season of construction, and with improved passenger and freight service, exploration of mineral properties to which the Bay line is tributary, has started on a really important scale for the first time. Several companies and syndicates have launched programmes to develop groups of claims in the neighbourhood of the new steel trail.

A dull mineral season is in view for the region north of Churchill, but reports circulating in mining circles point to interesting activity along the Hudson Bay Railway.

Within the past few weeks, half a dozen parties have travelled north on the line to explore promising areas quietly, before there are signs of a rush to one of the many new discoveries northeast of The Pas.

However, it is unlikely that prospectors will be allowed to travel north of Mile 412 this year, unless special arrangements are made with the federal government. More than one well-known mining man from northern Ontario has reached The Pas this summer with the hope of travelling to Churchill but the railway has been disappointed. In one instance, a man raised an argument here over the fact that an eastern station agent had checked his equipment right through to Churchill, and he had hurried to The Pas, only to find that he could not get to the port. Railway officials explained present regulations to the prospector, and he has to be content to postpone his trip until another season. It is reported in The Pas that efforts will also be made this year to trace down Indian reports that deposits of native silver lie in that triangle south-east of the Hudson's Bay River, and bounded by God's River on the east, and Oxford Lake on the south.

Last year a few samples of beautiful silver were found their way into The Pas from York Factory. It was stated then that a York Factory man and some Indian companions had found the native metal somewhere in the mystic triangle. Excellent detective work of the part of mining engineers failed to show up the origin of the native silver, and the find—if there has been one—remains undrugged.

For years, Indians have hinted of spectacular silver to be found in that 62,500 square miles of territory. This season may see a climax to the silent drama of centuries and, who knows but what a second Cortez, may spring up in that little explored region south of York Factory on Hudson Bay.

## Power Resources Of Manitoba

Claimed That 72 Per Cent. Of Water Power Resources Of Prairies Are Located In Manitoba

The considerable power resources of the Province of Manitoba are estimated at 5,000 h.p., of which 368,000 h.p. already are in operation. It is claimed that 72 per cent. of all the water power resources in the Prairie Provinces are situated in Manitoba. The Winnipeg River power sites are estimated to be sufficient to provide for a population of 2,500,000 in Winnipeg and to provide employment for 300,000 industrial workers. This power will turn out products worth in the neighborhood of a billion dollars every year.

## More Students In Paris

Latest registration figures of the University of Paris, place the total number of students at 65,980, an increase of 2,500 over the preceding scholastic year. Large outlays must be made for more lecture halls, study rooms and laboratories.

Wife (as they return from party): "Do you realize what you did?" Hubby: "No, but I'll admit that it was wrong. What was it?"

## New Application Of Marconi's Invention

"Is that Signor Marconi? Could you light my lamp? The electricity company has cut off the current."—Guerin Meschino, Milan.

W. N. U. 1846

## Setting Pace In Egg-Laying Contest

Rhode Island Red Has Lead Of Seven Points

Records of the Canadian egg-laying contest at the Dominion Experimental Farm, Ottawa, this year, show egg production to be 2.7 per cent. higher than in 1928 for the corresponding period. Birds entered appear to be swinging into greater production with the approach of summer, 33 pens having reached or passed the fifty-egg mark during the thirty-second week of the contest. It is interesting to note that of those 33 pens, 21 are White Leghorns.

While a pen of Barred Plymouth Rocks holds the leading position in the contest to date the leading individual layer so far is a Rhode Island Red. Two Barred Rock entries and this leading Rhode Island have laid the same number of eggs—14—but a slight advantage in weight on the part of the heavier Rhode Island Red gives her a lead of seven points over her nearest rival.

There is, however, indication that this year's egg-laying contest will show the same gratifying increase in egg production which has been in evidence each year since the contests were instituted in 1919. Some very fine records are likely to be hung up at the close of the contest.

## Will Work On "E. P. Ranch"

Two Lancashire Girls Take Jobs Offered By Professor Carlyle

Two Lancashire girls arrived in Canada recently on the Canadian Pacific liner "Duchess of York" en route to Pekisko, Alberta, where they will start their careers on the "E. P. Ranch."

The two girls, Doris and Muriel Howe, sisters, said, "We do not know what we are going to do out there; it may be clerical or it may be housework. But that doesn't matter. Professor Carlyle, manager of the Prince of Wales' ranch, engaged us and we are looking forward much to the new job as we are in the company of a brother who is coming from Saskatoon to meet us."

Doris worked in the office of a grocery business in Blackpool and her younger sister, Muriel, was in the public library at Blackpool.

## Fruit Crop Prospects

Prospects For 1930 Crop Are Considered To Be Good

The fruit crop prospects for 1930, as on June 1st, are encouraging and, generally speaking, indicate the possibility of a total crop approximating that of 1929, according to the Department of Agriculture's crop report No. 2. Cherries, plums, peaches, pears and grapes, all indicate considerable increase over last year ranging from 9 per cent. in the case of cherries to 34 per cent. for plums. Apples promise well and while the total crop is expected to be less than last year, indications point to a yield equal to or slightly heavier than the average commercial crop for the five-year period 1925-29, estimated at 3,178,124 barrels.

## B.C. Canned Salmon

Importance of Coast Industry Is Shown By Figures

Shipments of British Columbia canned salmon from Vancouver to points outside of Canada in 1929 amounted in all to 1,213,697 cases of 48 pounds each, indicating the importance of the Pacific Coast canned salmon industry as a factor in the external trade of Canada. Australasia countries continued to be first among the purchasers, with France second and the British Isles third. Thirty different countries were customers of the British Columbia canned salmon exporters last year.

## Does Not Indicate Hard Times

That the American people are still "rolling along" on rubber tires is evident from the March consumption figures of gasoline for forty-three states of the Union, which show use of 26,000,000 gallons daily, or 7.1 per cent. more than in the corresponding month of 1929. This does not look as much like "hard times" or decreased purchasing power.

There are upwards of 1,500 post-vans delivering mail in various parts of England.

The London city directory contains such names as Octobed, My, Whiff, Ohno, Cops and Looney.

## CENTER FOR ALPINE CLIMBING

ALPINISTS—Jasper National Park

Into a country where there are many important peaks still unexplored and even unnamed, will come Alpinists from all over the world for the 1930 annual camp of the Alpine Club, of Canada, July 28th to August 16th, in Jasper National Park. Alpine members of the medical profession of England, will be among those at this year's camp. In this vast, mountain kingdom, the climbers will try their skill in the Maligne Lake region, where such peaks as Mt. Sampson, Mt. Charlton, Mt. Unwin, Mt. Warren, Mt. Mary Vaux, Mt. Maligne, and Mt. Brazeau—ranging from ten to eleven thousand feet in height, offer most interesting climbing problems.

It is perhaps the splendid productivity, the massing of effects that distinguishes this region from all others. In the Rockies the folly of comparisons, where beauty is concerned, is always obvious. There are a score of lakes, each different, which, once seen, hold their place in the heart forever. Yet this stands out among them all. Where many of the others are chamber music, Maligne is the great orchestra. The composition forms one picture.

## Big Building Year

Several Large Building Contracts Are Announced In Saskatchewan

It looks like a big building year in Saskatchewan. A new \$200,000 apartment house and a new \$500,000 technical school are now under construction, while the Dominion Government is spending about \$400,000 on the addition to its grain elevator. Also, contracts running to about \$1,000,000 are involved in extensions (from Saskatoon to Roseburg and Outlook in one direction, and to Melfort and Tisdale in another), of the Saskatchewan Power Commission.

## New Type Mail Box

Sweden Installing One Which Gives Detailed Information

A new type of mail box with a detailed information chart is now being installed in Stockholm under the supervision of Sweden's postmaster-general, Anders Orm. The chart not only tells when the box is emptied, but also gives the location of the nearest post office or automatic stamp vending machine, as well as postal rates and the departure of mail trains for various parts of Sweden and abroad.

## FASHION

PARIS FAVORS PLAIN

A conservative printed crepe silk with fingerette collar and cuffs of crisp organdie reflects the newest idea of Paris in plaited skirt treatment.

Price 25 cents in stamps or coin (coin preferred). Address Pattern Department.

## High Milling Quality Of Canadian Wheat Flour Is Proven Under Rigid Tests

### New Provincial Park For British Columbia

Is One Of World's Finest Stands Of Timber

Cameron Lake Forest, on Vancouver Island, one of the world's finest stands of timber, will be made a provincial park under the plans announced by Premier Tomin. As a first step in this project, probably the most important ever undertaken in Canada to preserve a virgin forest, the government has ordered an immediate cruise of the entire Cameron Lake area. This will be undertaken by the provincial forestry service and a report will be filed with the government before fall.

The Cameron Lake Forest, known to travellers from every part of the world, lies between the lake and the hills which are crowned by snow-capped Mount Arrowsmith. It consists of giant fir, cedar and balsam, growing close together and reaching to such heights that the island highway, winding between them, is in twilight on a sunny day.

### Women's Institutes

1,150 Women's Institutes In The Rural Districts Of Ontario

There are now 1,150 Women's Institutes in the rural districts of the Province of Ontario with a membership of over 40,000. These Institutes exist for promoting social contacts and whatever is beneficial to the community as a whole, especially to women and children, through cooperative effort. The movement started at Stoney Creek, Ontario, in 1897, has now become world wide. Women's Institutes, wherever they exist, are non-sectarian and non-party political. Recently an international conference of representatives of Women's Institutes was held at Vienna, Austria, at which delegates from most of the important countries were present.

### Destructive Wheat Disease

Loss Caused By Foot - Rot Greater Than Any Other

Of all the fungous diseases affecting wheat "Take-All," or foot-rot, is the most destructive, observed the Dominion Botanist of the Department of Agriculture, at Ottawa. The actual loss caused by it is far greater than by any other single disease, rust included, or perhaps a combination of all known fungous diseases affecting wheat. A peculiar thing about this disease is that it appears only once in a series of years. Fortunately for Canada, the exercise of proper care and the wholehearted support of Western farmers have kept the disease from becoming seriously established in Canada.

### When Fate Was Cruel

Income Tax Papers Only Mail Received From Wrecked Steamer

Of 130 mail bags on a steamer wrecked on Shetland only four have been washed ashore, and of these four only one retained its contents in a condition fit for distribution. This was a bag of income tax papers—an instance of that "dry" humor which Scotland is famous. The worst of it is that when the papers are returned the authorities will not be able to distinguish the salty marks of the ocean from the letters shed by those by whom the documents were received.

### Study Indian Traits

Four French scouts, belonging to an organization similar to the Boy Scouts of Canada, except that they are college students, arrived recently at Banff, Alberta, where in the Canadian Rockies, they will make a study of Indians, for the ethnographical museum of Paris. They are Paul Cauze and Gabriel Eyudinet, painters; Raymond Gid, naturalist, and Leon Chail, photographer.

### The British Empire

The British Empire occupies about one-quarter of the habitable surface of the earth and its population exceeds one-quarter of the estimated number of the human race.

### Manitoba Telephone Building

The Manitoba telephone system will commence construction on a 15-storey exchange this year which will cost in the neighborhood of \$1,000,000. Tyndall stones will be used.

An alert Italian delicatessen dealer built his shop over an old mine shaft, so that the upcoming stream of cold air serves to keep his perishable commodities cool.

The high milling quality of Canadian wheat flour has recently been further proved by the Research Department of the Board of Grain Commissioners for Canada, as a result of a series of exacting tests. These tests show that blending of 20 to 50 per cent. respectively of Canadian flours with weaker flours grown in other countries give bread varying from 1 1/4 to 4 3/8 per cent. more cubical content than the country's domestic flour will produce. The largest loaf made during the tests was made from all Canadian flour. Samples of Russian, French, Australian, German, Danubian, Argentine and other wheats were used in the tests. Flour was milled from the samples obtained and loaves made from the flour and the results carefully noted. The addition of 20 per cent. Canadian flour with the unbleached flour from the whole of each country was then added and the size of the loaf was increased from 1 1/4 per cent. in the Russian to 25 per cent. in the Argentine. An increase to 35 per cent. of Canadian wheat made an additional improvement in the size of the loaf.

### Canadian Tobacco Industry

Considerable Quantity Of Canadian Product To Be Shipped To England

"If the necessity arises, the government will not hesitate to appoint a special commissioner in England to look after the interests of the Canadian tobacco growers," stated Hon. James Malcom, Minister of Trade and Commerce here, in commenting on the tobacco domestic situation.

"The Canadian Government is in close touch with the tobacco growing and the interests of the Canadian tobacco will be shipped to Great Britain this year," he said.

### Produces Better Eggs

Poultry Experts Find Large Hen Excels Production

The larger the hen the better the eggs she lays and the more there are of them. Poultry experts of the Dominion Department of Agriculture find that body weight has a very direct relation to egg production. A three pound hen will lay an average of 239 eggs a year, weighing 23 ounces to the dozen. With each 1/2 pound increase in weight there is an increase in the number of eggs laid and their weight per dozen—a four and a half pound hen will lay an average of 264.6 eggs a year weighing 24.5 ounces to the dozen. This item should be of particular interest to farmers keeping poultry flocks.

### Ornamental Shrubs

Development Of Hardy Types Of Shrubs and Perennials

Not the least important of the work being done by the Experimental Farms and Stations of the Dominion Department of Agriculture is the development of types of ornamental trees and shrubs and hardy perennials, annuals, and garden flowers suitable for use in all parts of Canada. Many of these have been found suited to even the most difficult climatic conditions, and the report of the Experimental Farm or Station nearest you will provide an indication of varieties adapted to use in your locality.

### Door Never Locked

The door of St. Martin's-by-the-Fields, one of London's famous churches, is never locked. For some reason they believe in St. Martin's that the church should be a sanctuary for those who are cold, wet, penniless and hungry, as well as a place of worship for all.

Airplanes are being used in battles against insect pests in Peru.

"I warn you that you'll have to pay \$5.00 for bathing here." "Certainly, just take \$5.00 out of my jacket pocket, because I'm committing suicide."—Gutierrez, Madrid.

WORLD HAPPENINGS  
BRIEFLY TOLD

Five thousand members of the American Legion and lady members of the Legion auxiliary are to visit Winnipeg for two days in August.

A British Empire Trade Exhibition, the first of its kind to be held in any country outside the empire, is to be held in Buenos Aires from March 14 to April 27, 1931.

A new India House was opened in London by King George with an expression of hope for the emergence of India from her present troublous era into days of peace and contentment.

Official figures on unemployment, showed 1,815,300 out of work in Britain on June 23. This was about 70,000 less than on June 16, but 697,493 above the same date a year ago.

Sir Joseph Ward, former premier of New Zealand, who resigned a few weeks ago owing to ill health, is dead. Sir Joseph, who was known as "the grand old man" of New Zealand, was 74 years of age.

Ralph Collins, Edmonton, Alberta, has been awarded second prize in an oratorical contest at the convention of the Optimist International, in Erie, Pa. Seven boys from clubs in the United States and Canada, competed. David Wolf, Washington, D.C., was first.

Marriages at famous Greta Green, the cloverly haven in Scotland, are to be made extinct by legislation. The Government plans to pass by next fall a measure which will make legal only marriages which have been performed by a clergyman or a registrar.

The Quai D'Orsay has submitted the name of Arsen Henry, who is French minister to Siam, to the Canadian Government for approval as the next French minister to Canada. Hon. Jean Knight, the first holder of this post, is returning to France to become head of the French Government Press Bureau.

## Plans To Visit the Moon

Scientist Has Perfected Model Of a Rocket Which Will Make Trip

At Horst, a little bathing place on the Baltic, Professor Oberth has been very busy of late perfecting an exact model of the rocket in which he intends visiting the moon. This model rocket is to be shot up by the explosion of the gas it contains and instruments concealed in it will record the composition of the atmosphere through which it travels. An automatic parachute will bring the rocket down again when the motors are exhausted. The rocket-model is expected to reach a height of 100 kilometers and to bring back valuable secrets.

## Boost For Alberta

Five Thousand Samples Of Alberta Wheat Sent To American Visitors

By way of an appropriate "boost" for Alberta, Hon. George Hoadley, Minister of Agriculture for the province, sent off 5,000 samples of Alberta wheat to American visitors to the recent Shriners convention at Toronto. It was pointed out that Alberta has carried off the world's wheat championship at the annual International Exposition at Chicago, four times during the past seven years, the honor going last year to Joseph H. B. Smith, of Wolf Creek.

## Building Permits

Building permits issued by 61 cities in Canada during May of this year were valued at \$19,621,392. For the first five months of 1930 the total value of building permits issued by these cities had a value of \$65,267,966.

A bird's eye is protected by three eyelids.

Another peace note. Italy will build twenty more warships.

Doctor: "You say you have been drinking six glasses of beer a day? I can only allow you half that number."

Patient (after a pause): "I really believe I used to drink a couple more."—Mummel, Hamburg.

W. N. U. 1846

## Will Explore Arctic Regions

Youthful Scientists To Spend Year In the North

Fifteen youthful explorers, whose average age is only 23 years, sailed from London recently aboard the exploration ship "Quest" for a year's exploration of the arctic regions. Their work will be done on the ice-covered stretches of Greenland and Iceland. The purpose of the voyage, which is under the auspices of the Royal Geographical Society, is to obtain information with a view to establishing an air route from England to North America across the Arctic region, with only 800 miles over the sea. H. C. Watkins, 23-year-old explorer, is leader of the expedition. His fourteen companions are all about the same age, and each is a specialist.

Watkins made a scientific exploration of Labrador last year, and of Spitzbergen the year before. The expedition will establish a base on the south-eastern coast of Greenland and a station on top of the ice cap, 8,000 feet above sea level. From there they will make notes on meteorological conditions in connection with flying.

The hold of the "Quest" was packed with a year's food supply, including six tons of food for the dogs, which will be picked up at the Faroe Islands. Two airplanes, two speed boats, sledges and several delicate meteorological instruments furnished by the government were included in the equipment.

A pampered passenger is a young turkey who is doomed to be served for the explorers' Christmas dinner.

Reports here said that if the data gathered proves the feasibility of the air route, a test flight will be made, and Canada will be asked to make a similar survey on the western side of the American continent.

## Scotland's War Memorial

Not Even the Humblest Worker Has Been Forgotten

No one seems to be forgotten in Scotland's wonderful war memorial which is built on the Rock of Edinburgh.

There it stands glowing with the carved and colored badges of every Scottish regiment that served in the Great War. While in bronze friezes or stained-glass windows, sailors, artillerymen, airmen, chaplains, nurses, and other workers are depicted. Even birds and beasts have their memorials.

Carved on the walls are the words, "Remember also the poorest-hearted that served and died." These come medallions framing the heads of a horse, a mule, a camel, a message dog, and other animals, with a cage of carrier pigeons and a group of canaries and mice labelled, "The tunnelers' friends," because these little creatures are used underground, where their swift collapse when the air becomes poisonous is a warning to men.

Not even the humblest worker has been forgotten by the grateful-hearted men who planned the building.

In the shrine is a block of marble set on the rock which rises to the floor, and on this block is a candle given by the King and Queen enclosing books containing the names of every Scotman who fell in the war. It is a place of pilgrimage to Scotsmen all over the world, this holy place where the noblest heroes and the humblest creatures are all remembered together.

## Vancouver Boy Wins

Trip To England

Selected As Best All Around Canadian Model Aircraft Builder

Ross Farquharson, 16, of Vancouver, was selected as the best all-around Canadian model aircraft builder at the close of the national championships held at Ottawa. His victory, in both senior indoor events, added to his second and third places in the outdoor contests, won for him a trip to England as the guest of Lord Wakefield, of Hythe. He had a total of 17 points.

J. A. Chamberlin, of Toronto, was a close second to Farquharson in the individual total, winning a first and second in the indoor events to add to the second-place points which he had won in the outdoor contests. He had a total of 15 points.

## Canadian Coke

During the past few years there has been such a marked increase in the use of coke for domestic purposes in Canada that the fuel bids fair to become a serious rival of anthracite, which has long been regarded as the standard fuel for this purpose, at least in the provinces of Ontario and Quebec.

Minister—And what parable do you like best, my son?

Willie—The one about the multitude that loafs and fishes.

## Winnipeg Newspaper Union

## IT'S SMART AND WEARABLE

A sportive frock of yellow and white printed linen boasts of its plaid skirt treatment.

It has the smartly belted waistline like the grown-ups are wearing, that achieves a pinched-in effect.

A large yellow bone button attracts attention to the tail closing of bodice with interesting cap sleeves.

The back is quite straight and slender.

Style No. 8444 is simplicity itself to make. It can be had in sizes 6, 8, 10, 12 and 14 years. For the miss of 8 years 1 1/2 yards of 38-inch material with 1/4 yard of 39-inch contrasting is sufficient to copy it exactly.

The two-piece skirt is merely pressed into box-pleat effect and attached to the bodice. Patch pockets stitched at edge of plaits, secure a snug hipline, to keep its line slender.

It's so attractive in white cotton broadcloth printed in sailor blue polka-dots with cap sleeves, belt and pockets of plain blue.

Shantung is stunning in opal-pink shade.

Tub silks in baby blue or baby pink tones is just the cutest idea ever that promises to be very popular this summer for both and country wear.

Nile green and white plaids print worn with green leather belt is smart.

Yellow-beige and brown stripes in men's cotton shirting fabric is very effective with the cap sleeves and pockets cut on the bias and worn with brown leather belt.

Printed dimity, printed handkerchief lawn and gingham checks also appropriate.

Price 25 cents in stamps or coin (coin preferred).

## A Remarkable Record

Seven Hundred London Firms In Business For Century Or More

It will be a surprise to Londoners to learn that their great city boasts no fewer than seven hundred firms that have been in business for one hundred years or more. When we consider how easily businesses change hands, how they fall into decay through a change of fashion or the coming of new inventions, how families die out and how the younger generation feels ever the urge to seek fresh woods and pastures new, it is a remarkable and praiseworthy record of industrious enterprise.

Although we may be inconstant in many things, we stand loyally by our prejudices.

The British Broadcasting Service will attempt to broadcast the roar of Niagara Falls.

## Takes First Glider Lesson

Prince Of Wales Coached By Famous German Pilot

The Prince of Wales has taken his first glider lesson.

The lesson was given near Lewes, Sussex, by Robert Kronfeld, a German, who is reputed to be the world's champion glider pilot. It consisted chiefly of a demonstration as how to operate the glider, and it was understood the prince did not actually pilot the ship.

The prince long has been an enthusiastic aviator and is reputed to be an excellent pilot, although for reasons of state he is never permitted to make solo flights. He always is accompanied on his flights by one of the best Royal Air Force pilots, but the prince handles the controls except when taking off or landing on strange or difficult landing fields.

## Montreal Has Grown Rapidly

Is Now Fifth Largest City On the Continent

Few cities in Canada have shown such substantial growth as Montreal. Within a decade the total assessable property has doubled in value and is now \$1,200,000,000. In 1914 the population was 625,000; today there are a million people in the city proper. In 1914 there were 153 miles of streets and today there are 600 miles. The municipal revenue, which in 1914 was \$10,000,000, is now \$38,750,000. Montreal has reached the rank of the fifth largest city on the continent.

## Kept Appointment

Four Men Keep Tryst Started 31 Years Ago

Keeping a tryst started 31 years ago, four men met in Trafalgar Square, London, England, on a recent night. In 1899 six young decorative artists, H. E. Hansfeld, G. MacDonald, G. Clifton, E. Bille, Brown and Edwards, were notified that the studio in which they worked was to be razed. They then made a vow to meet once a year. This year only Mansfield, MacDonald, Clifton and Bille were able to attend, but the two absent ones sent telegraphic greetings to their friends.

## Agricultural Conventions

Efforts will be made to bring as many large agricultural conventions as possible to the west at the time of the World's Grain Exhibition and Conference, in Regina, in 1932. According to four men met in a committee session, such conventions will be invited to meet directly prior to or following the show, in cities other than Regina. Delegates will thus be able to attend Regina session.

## Legislative Wheat Pooling

In accordance with the decision of the Delegates of the Saskatchewan Wheat Pool at the recent semi-annual meeting, a referendum will be taken among pool members on the question of legislative pooling. Ballots will be mailed from head office not later than August 1, and each contract signer is being asked to register a vote on the question.

## SUNDAY SCHOOL LESSON

JULY 20

MOSES "A COURAGEOUS LEADER"

Golden Text: "By faith he forsook Egypt, not fearing the wrath of the king; for he endured, as seeing Him who is invisible."—Hebrews 11:27.

Lesson: Exodus 18:1-14; 21:22; 3:1-14; 11:1-10; 32:30-35; Deuteronomy 34:1-8; Hebrews 11:23-29.

Devotional Reading: Psalm 90, 12-17.

## Explanations and Comments

The Call Of Moses, verses 1-10.—The summons to become the leader of his people, deliver them from oppression in Egypt and bring them forth on their way to the Promised Land, came to Moses as, in his care of the flock of his father-in-law, Jethro, the priest of Midian, he wandered from the back of the wilderness (that is, the west; the east is always the front) to Horeb, the mountain of God. There before the bush that burned and yet was not consumed, Moses heard God speaking to him. Just as the account of the temptation of Christ in the wilderness must have come from Christ Himself, and is his pictorial way of portraying His inner experience, so the account of the call of Moses in the wilderness must have been told by Moses himself, and may have been given by him in this pictorial way. The burning bush may have been an outward representation of an inward experience—the flame of enthusiasm for a great cause. Be that as it may, it is assuredly true that Moses had the power to see the divine origin of the glowing beauty of the bush; he was able to see God in the things of earth.

"Moses stood before an ordinary bush, and he became aware of God; Jeremiah stood before a budding almond tree while all around was dead, and he became aware of God; Wordsworth stood before a little primrose on a rock, and it became to him the court of the Deity."—J. H. Jowett.

Draw your eyes higher; put off thy shoes (sandals) from off thy feet, for the place whereon thou standest is holy ground." Recall Jacob's sense of God's presence at Bethel and the holiness of the place.

"Earth's crowned with heaven, and God's common bush affix with God." But only he who sees, takes off his shoes; The rest sit round it and pluck blackberries."—Mrs. Browning.

With a new flash of insight Moses knew that God was calling him to a stupendous task, that it was God's will that he should return to Egypt and accomplish the deliverance of the enslaved Israelites. All this is expressed in the words of verses 7-9.

## Railway Passes In The Rockies

The map sheets of the Interprovincial Boundary between Alberta and British Columbia published by the Topographical Survey Department of the Interior, show the three passes of the Rocky Mountains through which railways have been constructed. Crow's Nest Pass has an elevation of 4,453 feet; Kicking Horse Pass 5,320 feet, and Yellowhead Pass, 3,711 feet.

## English Students For Canada

Hamilton Fyfe, the new head master of Queen's University, Kingston, stated recently that a movement was being started by which English public school boys will go to Canadian universities in the same manner as Americans and South Africans are Rhodes scholars at Oxford.

## Reciprocal Trade

British Bankers In Favor Of Free Trade Within the Empire

Reciprocal trade agreements between the nations comprising the British Empire and the retention of an open market for Empire products was urged in a resolution adopted recently by representatives of several leading British banks meeting in the offices of Hambro's Bank, London, England. The meeting was presided over by Sir Eric Hambro.

"Urgent measures for the promotion of inter-empire trade are needed to secure and extend the market for British products, both at home and through export trade," the resolution read. "Bitter experience has taught Britain, that hopes expressed four years ago in the plea for removal of restrictions upon European trade have failed. Restrictions have been materially increased and the sale of surplus foreign products in British markets has steadily grown. While we retain hope for the ultimate extension of free trade worldwide, we believe the immediate step for securing and extending the market for British goods lies in reciprocal trade agreements between the nations of the British Empire. As a condition of securing these agreements Britain must retain an open market for all Empire products while being prepared to impose duties on all imports from other countries."

## London Traffic Project

Scheme To Construct Underground Lines For Transportation Of Goods

A scheme is on hand to make possible the removal of goods traffic from London streets. It consists of the construction of underground lines, with fifty-four stations, for the sole purpose of carrying goods. The promoters are anxious to build seventy-five miles of tubes at a cost of about \$200,000,000. All the principal railway termini and goods yards would be connected; the docks, wharves, and public stores would have their private stations. It is said that 125,000,000 tons of goods are carried annually in London, and the trade of the Port of London amounts to \$144,000,000 a year. According to the promoters of the new scheme the cost of existing congestion in the streets is \$120,000,000 per annum, while the railways have estimated at \$300,000 a year the amount of money they lose by the detention of goods lorries at Billingsgate Market alone.

## Eighteenth Century Newspapers

The first newspaper in Quebec appeared in 1764 when the Quebec Gazette was founded. The "Royal Gazette" and "New Brunswick Advertiser" appeared at St. John in 1785, and the first paper in what was then Upper Canada appeared in 1793 at Niagara (then Newark), under the name of the "Upper Canada Gazette and American Oracle."

China, home of the silkworm, is now importing artificial silk.

It takes eight large eggs, or nine small eggs, to make a pound.

## Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

**WINDOLITE**

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER XX.—Continued.

"Since the hair itself appears to have been dipped in star dust," he the gallant response, "their absence is not noticeable."

"You are a base flatterer," declared Charmian, and turned away, thereby transforming what had been "the gold bar of heaven" into a plain New England window sill!

But the doctor liked his fancy, and Grandma, who had become accustomed to the appellation, merely smiled. Then her face sobered, and she replied: "You've noticed it too, sonny?"

He nodded, saying thoughtfully: "Something's gone out of her. For lack of a better word we'll call it pep. She seems on edge. Last night I ventured to ask if she didn't feel well, and—she took my head off!"

He grinned at the memory, while Grandma chuckled as she admitted: "Sometimes she gets that way. Charmian's a good girl, but she's no saint, and I'm glad of it. She's human like all the Davises. I'll tell you what's the matter, Doctor, but you mustn't ever let on I spoke of it. It's Jimmy Bennett."

John Carter didn't suspect that Grandma's wise old eyes were watching to see how this would strike him. His head tilted suddenly, as if her words surprised him, and he echoed: "Bennett? You mean she . . ."

"I don't mean anything of the sort," she interrupted. "All I mean is that before Jim went away Charmian did something that hurt his feelings. She misjudged him; and when she found out her mistake she felt just terribly. So she wrote him a letter. I don't want to say she said, but it took two stamps so she must have said considerable. That was all of a month ago, and he's never answered. For two weeks she hasn't mentioned a word about it; but you can depend upon it, that's just what's ailing her now."

John Carter looked thoughtfully into space until Grandma gently reminded him that his lunch was getting cold. He seemed to pull himself back from somewhere at her words, and said: "Letters sometimes go astray, Grandma. Didn't she hear from him at Christmas?"

"Only a card. Not—not what you'd call a real affectionate card, either."

The doctor laughed, though his eyes still looked troubled.

"I bet there's some explanation," he insisted as he resumed his meal. "I don't think Bennett liked me particularly; but it struck me that he'd be a darned nice chap if only he'd knock the chip off his shoulder."

"Jimmy's the salt of the earth," said Grandma loyally.

"And he's in love with Charmian," added the doctor.

"Always has been," said the old lady, "and in my opinion the only

reason she's not in love with him is because he's always been too close. She's never had a chance to get a well, sort of bird's-eye view of him, so to speak, and see what a splendid boy he is. She's used to him, same as she's used to the kitchen range and the front door; and I'll say for Jim that he's been every bit as useful to her as they have! I miss him like anything."

"From all appearances I should say that your granddaughter misses him, too," ventured the doctor, as he took Grandma's empty plate, and proceeded to bring the desert that Charmian had prepared. "Are you sure the letter was addressed properly?"

"That's my one hope," said Grandma, brightening. "Lizzie Baker was in yesterday and said she had a card from Sarah Bennett a week ago, and they were off somewhere on a trip, all of them. I told Charmian, and she seemed to me she was more cheerful for a while. This is a good pie, isn't it? Charmian got up early and made it before breakfast."

"She's no business to do such things!" declared John Carter. "She needs more sleep. Look here, Grandma, does it make things harder for her—my being here?"

"My stars, no! Maybe she gets a little more food ready for noontime; but it's an awful comfort having you look after the furnace, sonny, to say nothing of the times you drop in to speak to me. Charmian said just yesterday that she didn't see how she could keep the school without you being here. Don't you get fretting over that. Take another piece of pie, Doctor. I'll please Charmian to think you liked it. She's a real good cook, isn't she? She says if the school board turns her down next year she'll get a job at the hotel!"

"You needn't bother to wash the dishes," said Grandma, when their luncheon over, the young man started to clear the table. "You forgot my never seemed right to me for you to pay for a meal and then clear up afterward. You leave 'em be."

The doctor threw her a smile, but continued at his task nevertheless, as he cleared the dish pan with clear water. "You forgot my reduced price at which I eat it was in the contract that I clean up when I had time; and so far as I know a card to South Wickfield is the only prospect for this afternoon."

"Maybe if Ezra here in town this you could leave it at the school as you go by," suggested Grandma.

"Sure!" he replied with cheer. "I meant to time things so I could stop for Charmian on the way back. But she's grown this week on the exercise she takes of leading him to town this way. He says maybe it's against his law on an R.F.D. man to stop on Main Street, but if 'tis, he's not going to find out. He saves Charmian a walk to the post office every night, and we appreciate it. Just hang this dish towel behind the stove. I'll freeze stiff if you put it out today."

"Well," murmured the old lady to herself, when John Carter had escorted her back to her place by the window and gone out to his office, "I don't quite what to make of that young man. I told him Jim Bennett was what was worrying Charmian; but after that one minute he was natural as life, and he didn't seem to mind when I asked him to carry her to the post office. I can't say Jim's letter if it came today. I can't make out whether he's trying to act square to Jimmy, or—"

Grandma stopped abruptly, peering from the window, and then said: "Here comes Lizzie Baker. She's got on her ulster, and her old mink fur piece on top of the lavender skirt that Mrs. Merry knit her for a Christmas gift. I'm sick to death of that fur since the moths got into it and ate a piece out of the back. I hoped she'd stop wearing it when Mrs. Merry gave her the scarf, but she'd as soon think of leaving it home after the first of November, as she would of leaving her false teeth. She's coming. Hello, Lizzie! What's up today?"

"I wish the mercury was up," replied Miss Lizzie, as she dropped the fur onto the table and began to unwind the scarf. "It's only six above zero, and what'll be made of this morning, Grandma, but I didn't have a chance. Just as I put my bread in the oven Luelle More Purdie come over and made me burn it. I can't forget all about it. She talked I was being hawking words with the deacon and wanted to let off steam. She never was one to keep her affairs private. Seems that Edgar wants to sell her house over to South

## GO OVERNIGHT

Wickfield, and invest the money to better advantage; but Luelle says she's going to keep it for a refuge."

"She may need a refuge before she gets there," with Edgar Purdie, responded Grandma, "I'll tell you, Lizzie. Take off your coat or you'll never be able to squeeze into that rocker."

Miss Lizzie obeyed, remarking on how warm and comfortable the house was.

"You're lucky to have a man on the place, Grandma; not that I miss what I've never had, but the older I get the harder it is to keep real comfortable without help. Yes, Luelle, I bet she's up and down. She's read somewhere that city folks have what they call trial marriages—if they get sick or their bargain they just spit up. She told the deacon hers was that kind, and he called her a wasp. She said I ever such a word passed his lips again, she'd clear out."

"Do tell!" ejaculated Grandma. "It must have been a fight."

"I guess 'twas. No wonder I burned the bread, hearing her tell about it. Gam Garfield may have a law suit on his hands yet! Dear me auz! that's news enough for one day. Grandma, but it's not all I had a letter from Sarah Bennett, and they've bought a fruit farm out in California!"

"Good land!" cried Grandma. "Has she lost her mind, or is Jimmy going to run it for her, the farm, I mean? Jim couldn't run his mother's mind if he was a try till Gabriel blows his trumpet."

"It's more likely that she runs him," replied Miss Lizzie. "George K. told Jim that he could have his place at the bank whenever he wanted it again; but it looks now like he'd never come back. I suppose they'll need him 'round the farm. You don't have to milk fruit trees, but I presume a man would come in handy just the same; and Sarah's never Jim come back to Wickfield without her, you can depend on that."

Miss Lizzie rocked violently for a minute, while Grandma appeared to be gazing into the street.

"Sarah Bennett's gone! I'd say, California," continued the caller, having caught her breath. "She says she feels like a new woman; and that she's missed Sophie something dreadfully all these years without her! I know it. Seems that Sophie's wanted a fruit farm for years and years. She knows all about the business, and they've gone into a sort of partnership. Sarah provides the money, I presume, and Sophie the brains. And here's the queerest thing yet. Grandma: She never said one word about Jim, or what's to be done with her fine house here in Wickfield! Don't that beat all!"

(To Be Continued.)

No child should be allowed to suffer an hour from worms when prompt relief can be got in a simple and strong remedy—Mother Graves' Worm Exterminator.

Names Instead Of Numbers  
Telephone Operators In San Francisco's Chinatown Need Good Memories

One of the points of interest in San Francisco's Chinatown is the telephone exchange and every operator must be equipped with a long distance memory. There are 4,200 subscribers in this exchange and names instead of numbers are used in making a call. For instance, if you wanted John Smith and there was more than one John Smith in the directory, you would have to explain on what street your John Smith lived, what his business or give some other characteristic by which the operator could identify him. It is thus easy to understand what a memory an operator in a Chinese exchange must possess.

Linking the Empire  
Phone Service Soon Available To Every Important Port

It will soon be possible to telephone from England to India. It was stated by the post office department that, if the negotiations now under way are successful, the operation of the service in this country would be similar to that with Australia, with a transmitting station at Rugby and the receiving station at Balakrishna, Hyderabad. This will mean the connection by telephone of almost every important part of the empire.

Her Butler: "Sir, may I have your daughter?"  
Red Man: "Yes, but you'll have to sign a two-year lease."

Minard's Liniment gives quick relief.

## Summer Strains

For all the strains the flesh is heir to during the summer months—use Minard's. Popular for fifty years.

W. N. U. 1848

## Exploring the Depths

Naturalist - Adventurer. Sets New Record In Deep Sea Diving

With both poles of the earth explored by land and air, and with only the most remote deserts of Asia and Australia still unexplored, it may seem that anyone travelling only a few hundred miles from New York would have a difficult time finding territory never before seen by man. Yet William Beebe, the naturalist-adventurer, has done that very thing. Protected by a giant steel globe, with fused quartz windows and oxygen tanks, he has descended 800 feet into the Atlantic ocean off Bermuda, viewed the fishes and the plants, and returned to the surface safe and sound.

Mr. Beebe's feat is particularly outstanding when one realizes that the greatest depth heretofore achieved by deep-sea divers has been only 325 feet. Yet Beebe now plans to go on down to more than three times his 800-foot mark, striving for the goal of half a mile.

For some years Mr. Beebe has been revealing sources of adventure in civilization's back yard. His keen eyes find drama even in the insect life on a city roosebush. So it is scarcely surprising that he should be the first to venture into an entire new world less than a sixth of a mile beneath the paths of everyday life—Philadelphia Ledger.

## Carries Air on Airplane

Machine Three Feet High and Weighs 1,100 Pounds

Captain R. D. Archibald, who last year flew from Los Angeles to Sydney, N.S., arrived in New York with the announcement he had secured the ultimate in travel convenience.

Captain Archibald brought with him an automobile which he will carry in his airplane on future flights. He started immediately on a trip to Nova Scotia, the automobile being the car which stands

securely three feet off the ground. It is upholstered in red morocco.

## Might Be Explanation

Decrease In Drinking Because People Are Less Wretched

Dr. Weeks told the London Lions' Club Commission that the working class is "emancipated" from alcoholism. With his broad conclusion that the drinking habits of the population are improving no one will disagree.

Those dreary days of "drunk for a penny and dead drunk for twopence" are gone for ever. They were dreary, and that is why there was so much drinking. Many turned to drink to drown their wretchedness. Perhaps the main reason why drinking is decreasing. For the masses the standard of living is today far too low, but it is much better than it was 50 years ago.—London Daily Herald.

## Plants Yearly Tree

Every spring for 48 consecutive years, Cheney F. Whitney, of Shortville, N.Y., has returned to his old homestead in Orleans and planted a tree. Now ninety-three years old, Whitney has set out his fifty-eighth tree. Every one he has planted since 1872 has thrived.

## Good Advice

There is a time for all things. It was a wise wit who suggested: "If you are going to do a good thing, do it now; or a mean thing, wait until tomorrow." The pity of it is that most of us reverse the process and spoil the order of things.

## FROM MOTHER OF EIGHTEEN

Read How This Medicine Helps Her

Cardston, Alberta—"I am fifty-eight years old and the mother of eighteen living children. We are on a farm and I am a very healthy mother considering that I have such a big family to work for. I have used Lydia E. Pinkham's Vegetable Compound and I have depended on it for many years.

When I had this picture taken, the photographer was telling me about his wife's ailments and after I told him about the Vegetable Compound he went to the drug store and bought her two bottles."—Mrs. Barbara S. Sams, Cardston, Alberta.

## Building Large Hotel

London is going in for buildings on larger scale. Not only will Thames House, Millbank, be the largest commercial building outside America, but the new hotel to be erected on a site being cleared near the Marble Arch, is to have 2,000 bedrooms with bathrooms, and will be the biggest in Europe.

## First Apples Exported

The first apples exported from Nova Scotia are said to have been shipped by sailing vessel from Halifax to London in 1846, the price realized being \$2 per barrel. In 1896 a shipment of 700 barrels was made by schooner to Boston, U.S.A., the price realized being \$2.50 per barrel.

## Saxony now has 1,543 singing societies with 56,118 members.

For Bilasters and Bells—Minard's Liniment.

## To Rival the Zeppelins

Germany Planning Giant Airplane To Challenge Dirigibles

An airplane company in Berlin plan to make a giant airplane of the "rig wing" type—that is, with the wings, everything being carried inside the wings—as a challenge to dirigibles. It will carry 120 passengers, with a "pay load" of 21 tons, and will have a cruising range of 5,000 miles. It will have Diesel engines, burning crude oil.

The world will welcome a test of this kind. So far, the Zeppelins have had a monopoly among big craft carrying many passengers, and have been the only trustworthy trans-Atlantic flyers. They have the great advantage of being self-supporting in the air, without their motors are going or not.

The airplane though, has its peculiar advantages, the chief of them being speed. The dirigible may be blown back, or out of its course, by a gale. A plane can drive through a gale.

The dirigible had it hard to cross the North Atlantic because of prevailing head winds, although turning toward the equator they can swim ahead in the trade winds, as Columbus did. Planes with enough motive power, and enough size for stability may solve the problem for direct routes between Europe and North America.

## Nine Daily Foreign Papers in Canada

Chinese Have Four, Japs Two, Jews Two, and Finns One

There are nine daily newspapers in Canada, the Star points out, which are not printed in either English or French. Victoria and Vancouver have one Chinese daily each, and Toronto has two; Vancouver has two Jap dailies; Winnipeg and Toronto have one Jewish daily each; Sudbury prints one in Finnish. There are in addition some 38 weekly papers not printed in either English or French. The claimed circulations of these run from 1,650 to 20,000.

Winnipeg prints about half of them although Montreal, Toronto, Vancouver and Edmonton are well represented.

## The Sensible Age

Very Difficult To Determine What Is the Sensible Age in Manhood

A young woman in Boston has advertised for a Canadian husband. She is 20 and he must be 30, for, she says with all the wisdom of 20: "You know they are never sensible until they are 30." That is what you might call a classical illusion. Why should a young woman assume that a man is sensible when he is 30 just because it has always been supposed he is.

Actually he is never really sensible if he is any good at all; the poet in him is doing the most crazy things at the most crazy times. If not, he is not sensible.—Vancouver Province.

Miller's Worm Powders are sweet and palatable to children, who show no hesitancy in taking them. They will certainly bring worm troubles to an end. They are a strengthening, stimulating medicine, correcting the disorders of digestion that the worms cause, because of course a healthy tone to the system most beneficial to development.

## Associated Fruit Growers

Co-operative Organization In B.C. Is Doing a Big Business

In seven years the Associated Growers of British Columbia, a co-operative organization, has shipped 26,663 cars of fruits and vegetables, bringing returns of \$25,697,425, according to an official report. The cost of operations was less than three and one half per cent. Big crops have not always returned the most money to growers, it was pointed out. In 1927, 3,822 cars brought \$4,193,598, and in 1928, 4,463 cars brought \$3,833,619.

## Built To Fit

A boat much larger than the stream in which it floats is a very common sight in certain parts of China. Junk navigators with ease these ribbon-like interior canals. These boats, whose superstructure is strikingly large, often hang over the banks of the canals, through which they pass. The bottom of the craft is small enough to "fit into" the stream.

## Canoeists' Paradise

Within the Prince Albert National park lie three important bodies of water, as well as some forty or fifty smaller lakes. These large lakes are so closely connected by waterways that one may paddle for days in this lovely region which has been called "the prairie's wonderland."

## Personal and Local

W. McGrath is in charge of the Conservative committee rooms, and if doubtful voters require information on the national policy since Confederation, or forecasts and betting odds on the election results, Bill is there with the "dope."

Steve De Martin was admitted to hospital on Monday morning, his foot having been injured by being run over by a mine car.

Deputy returning officers for the Dominion Election polls in Coleman will be S. Leasky, Roddy McLeod, W. Whyte, H. Turner and E. Ledieu.

Grace McKinnon and Margaret Allan are attending the C.G.I.T. camp at Kasota Beach, Sylvan Lake.

Mrs. Celli is spending a few days on the farm at Creston, where Mr. Celli is looking after the pecking and marketing of his fruit.

The Salvation Army Choristers will be in Coleman on Saturday and Sunday and will hold open-air services in conjunction with the local officers, Capt. Slous and Lieut. Wiseman.

John Barber, a former Coleman boy, now in the offices of the Consolidated Mining & Smelting Co. at Trail, visited Mr. and Mrs. Pryde during the week, returning on Tuesday.

Mr. Melville Anderson, of Anderson & McLean, eight specialists, of Calgary, announces next visit to G. R. Powell's, Coleman, Tuesday, July 29th. 20 years experience in regular visits assures you of satisfaction in all optical work.

Roddy McLeod went to Fernie on Monday evening and became so enthused over hearing Dr. R. F. Manion, that, though a Liberal in politics, he decided that it would wake up the Pass towns if they heard a speaker of his calibre. So he established contact with Dr. Manion, with the result that meetings were arranged for Coleman and Blairmore for last evening. Bob Gray and S. G. Bannan drove to Kimberley on Tuesday to bring him to the Pass on Wednesday, and everybody certainly had an "earful," thanks to Roddy's initiative. A report of the meeting will appear in next issue.

### ST. ALBAN'S CHURCH

Service on Sunday morning at St. Alban's will be at 11.15 a. m., and at St. Luke's, Blairmore, at 7 p. m. Rev. A. S. Partington, Rector.

### Coote Meetings Well Attended

(Continued from Page One)  
took in pushing this request in the House. He believed it would help to relieve unemployment in the mining towns.

The party he represented was closely allied with the Labor party, and on many measures they were in complete accord in the House. Speaking of co-operation as against exploitation, he stated that it never made a millionaire and never made a pauper, and there was a good policy for all of the people, not for any special class.

The excise duty levied by the government on automobiles he considered should be turned over to the provinces. This amounted to 40 millions of dollars, on what was now considered a necessity in the lives of the people. This money used on highways would help to relieve unemployment.

He felt that as an Independent he could do far more for his constituents than by lining up with the old parties, and the U.F.A. and Labor group in the House had accomplished a great deal.

He dealt at some length with tariff matters, particularly in regard to the efforts of the British Empire Steel Corporation to secure a more favorable tariff, while at the same time they would not grant their workers the eight-hour day and paid scandalously low wages. Both Premier King and Mr. Bennett side-stepped when it came to a vote in the House. In the face of their past records, what could the workers expect from party government.

Following Mr. Coote, Vice President Scholfield of the U. F. A. addressed the meeting. He has accompanied Mr. Coote on his tour of this part of the riding.

Mr. Fairhurst, chairman, read a letter from the All-Canadian Congress of Labor urging the workers to vote for Labor or Farmer candidates, as they were the advocates of legislation for the benefit of the workers.

### Alberta Provincial Elections Election Expense Statement of Richard Sudworth

Printing of pamphlets, leaflets, polling cards, etc.	\$56.40
Postage on leaflets	18.00
Commonwealth expenses	22.50
